

EditShare is the first affordable storage solution for true collaborative workflows and is designed for the creative industry's leading NLE products like Avid Adrenaline, Avid Xpress Pro, Apple Final Cut Pro, Canopus Edius, Adobe Premiere Pro, Leitch Velocity, and Pinnacle products.

EditShare is also the ONLY solution to offer true **Apple Final Cut Pro** and **Avid Project Sharing**, meaning that you can be even more creative and efficient. The power of *Complete Collaboration* means that multiple editors, artists, and VFX teams can seamlessly work on the same jobs at the same time, without the chance of accidental loss of valuable data at any step of the process.

EDITSHARE 3U SYSTEMS

- For the small to medium facility, the 3U system is available in 8 & 16 drive models.
- From 2.56Tb to 12TB storage capacity.
- Triple redundant power supplies, RAID protection.
- Small footprint combined with high performance.

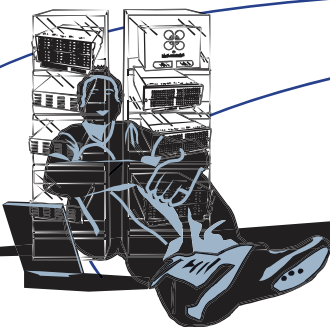

EDITSHARE 5U SYSTEMS

- A 24 drive system designed with high performance in mind.
- The perfect choice for any job with a requirement for maximum simultaneous connections.
- Store from 2.56TB to 18TB in the same chassis.
- Quadruple redundant power supplies, RAID5 or 6 options.

EDITSHARE 8U SYSTEMS

- When you need the largest storage capacity in a small footprint, this system accommodates up to 30TB in the one system.
- Maximum storage, maximum performance, minimum cost.
- Start at 12 drives and expand to 40 drives when you need.
- Quadruple redundant power supplies.

Award-winning collaboration from an Award-winner

EditShare founder and CEO Andy Liebman, winner of two Emmy Awards for documentary production, created EditShare to design storage products that *fuel* the creative process.

EditShare's vision is to create the world's best collaborative storage and software solutions for the film, television, and content creation industries.

Today, EditShare systems are found across the globe in broadcast TV, feature-film post, and almost all content-creation markets.

With EditShare's great cross-platform support, the latest and most cost-effective storage hardware, and none of the seat license fees normally associated with high-speed storage, YOU can be the winner.

EditShare is pioneering collaboration for film & TV production:

EditShare is the first and only non-Avid solution to offer Avid Project sharing

EditShare is the first storage solution to support 10 Gigabit Ethernet

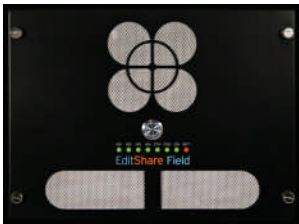

EditShare is the first and only company to offer true Project Sharing for Final Cut Pro

EditShare is the first to deliver a Portable Shared Storage Solution

All EditShare solutions include the tools to “unleash the creativity” of your video content creation departments... and the technology and sheer speed to support ALL their demands.

EDITSHARE FIELD

- The world's first portable shared storage solution - a complete collaborative storage system in a mini-size.
- Perfect for news, sports, or production teams out on location
- Silent, very portable, and ruggedized design with 3TB (RAID5 2.2TB usable) storage
- Built-in Uninterruptible Power Supply and redundant power supplies
- Supports 11 DV25 streams or 2 uncompressed SD/high bit-rate compressed HD streams

EDITSHARE METRO

- The perfect collaborative storage for the budget conscious facility, Metro offers fantastic performance at the most economical price for a true shared media storage system
- 4 or 8 drive, from 1.3 to 4TB with RAID5
- 4U tower or rack mountable chassis with dual redundant power supplies
- Supports 20 DV25 streams or 4-6 compressed HD or SD streams
- Expandable with ESA (Extreme Scalable Architecture)
